Kip:

We greatly appreciated the expanded comment period and the opportunity to provide additional science to inform permitting.

We have been distracted by travel to the North Central Aquaculture Conference and prepping for Aquaculture America 2020. Is it possible that we can send additional references as time permits?

Paul

Subject: Annotated marine net pen literature review

Dear Sir/Madam:

Attached is a literature review, that is not as complete as we would normally produce, assembled to inform the draft Ocean Discharge Criteria Evaluation. It appeared to the NAA that the citations were dated within the draft evaluation and that research within the last two decades would inform your analysis which was complete and comprehensive for a time period.

If you should have any questions, please do not hesitate.

Thank you,
Paul
